Summary

I am a Computer Engineering graduate with hands-on experience in web development, database management, and system automation. Skilled in PHP, Laravel, JavaScript, MySQL, and Bootstrap, I have contributed to projects such as a School Management System and the iSyn-app automation tool. Beyond technical expertise, I bring strong problem-solving, adaptability, and collaboration skills, with a passion for creating scalable and user-friendly solutions.

Experience

AKSI iSynergies – Web Developer Intern

Cabanatuan City, Province of Nueva Ecija, Philippines

06/2024-08/2024

Intern – ASKI iSynergies

- Collaborated with the development team on coding, debugging, testing, and database management, ensuring smoother system performance.
- Enhanced system functionality and improved user interface design, contributing to better usability and user experience.
- Actively supported the full development cycle, from troubleshooting issues to implementing small feature upgrades.

Project Highlight – iSyn-app

- Contributed to the development of iSyn-app, an automation platform for managing inventory, sales, vouchers, and data.
- Assisted in coding, debugging, and feature enhancements, improving overall system performance and reliability.
- Collaborated on UI/UX improvements, ensuring a more intuitive and user-friendly interface.
- Supported database management and testing tasks to maintain data accuracy and system stability.
